New! Family network protection

- **NEW** Manage the security of your home network from a single location. BitDefender software from other computers in the network can be remotely configured, while tasks such as scans, backups tune-ups and updates can be run on-demand or scheduled to run during off-hours.

Play safe, play seamlessly!

- **IMPROVED** Reduces the system load and avoids requesting user interaction during games.

- System Requirements:**
- Windows XP with Service Pack 2 (32/64 bit) or higher
 - Windows Vista (32/64 bit) and Windows Vista SP1
 - Windows Home Server
 - Supported IM Software (for IM encryption)
 - Yahoo! Messenger v8
 - Windows Live Messenger v8.5
