IT-GRC Automation

The QualysGuard cloud platform automates the collection of security and compliance data with customizable polices, questionnaires and workflows, helping organizations to further automate and expedite compliance requirements.

Benefits

- Automated & agent-less compliance auditing supporting multiple regulatory initiatives & mandates
- Customizable questionnaires & business workflows to evaluate controls, gather evidence & validate compliance
- Seamless integration with enterprise GRC solutions

Our Journey Into the Cloud

Qualys was founded in 1999 at the height of the technology bubble, when Internet security was just beginning to appear on executive agendas. The company launched QualysGuard in December 2000, making Qualys one of the first entrants in the vulnerability management market. QualysGuard's market entry was marked by a powerful combination of highly accurate and easy-to-use scanning technology that pioneered the revolutionary new approach to delivering security applications through the cloud that would become known as "Software-as-a-Service," or SaaS.

Qualys' customers were clearly impressed by the power and flexibility of the SaaS model: lower total cost of ownership, high scalability, centralized management from any location, and continuous access to new and upgraded applications. The QualysGuard platform has grown over the past decade to become the leading cloud-based solution helping organizations strengthen the security of their IT infrastructures and conduct automated security audits to ensure compliance with policies and regulations.

About Qualys®

Qualys, Inc. is the pioneer and leading provider of information security and compliance cloud solutions with 5,500+ customers in 85 countries, including 51 of the Forbes Global 100. The QualysGuard Cloud Platform and integrated suite of applications helps businesses simplify security operations and lower the cost of compliance by delivering critical security intelligence on demand and automating the full spectrum of auditing, compliance and protection for IT systems and web applications. Founded in 1999, Qualys has established strategic partnerships with leading managed service providers and consulting organizations including BT, Dell SecureWorks, Fujitsu, IBM, NTT, Symantec, Verizon, and Wipro. The company is also a founding member of the Cloud Security Alliance (CSA).
