

QUALYS GUARD® VULNERABILITY MANAGEMENT

EXPRESS EDITION

THE EASIEST WAY TO ELIMINATE VULNERABILITIES AND MANAGE IT SECURITY RISK FOR SMBs

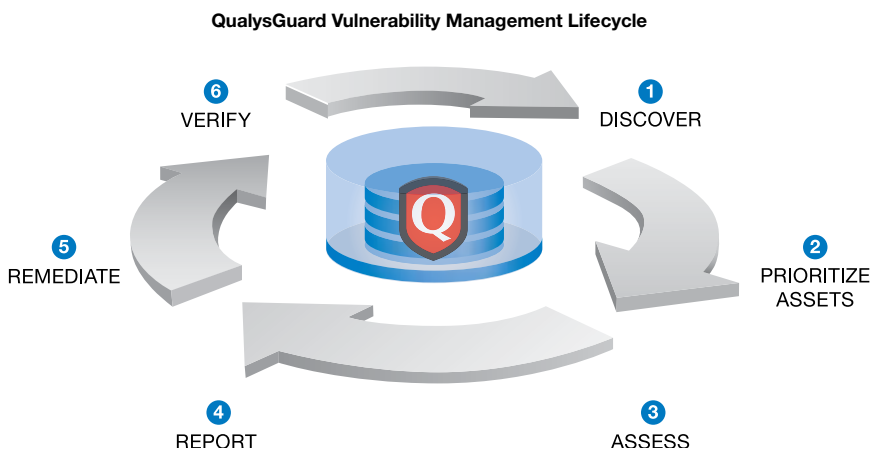

QualysGuard® Vulnerability Management is an on demand solution, fully automated to identify vulnerabilities, track remediation and reduce network security threats. Driven by the most comprehensive vulnerability KnowledgeBase in the industry, QualysGuard delivers continuous protection against the latest worms and security threats without the substantial cost, resource and deployment issues associated with traditional software.

By continuously and proactively monitoring all network access points, QualysGuard VM dramatically reduces security managers' time researching, scanning and fixing network exposures and enables companies to eliminate network vulnerabilities before they can be exploited.

Thousands of SMBs depend on Qualys for protection because QualysGuard dramatically simplifies the complexities associated with IT security and compliance, and provides a streamlined and automated way to accurately identify and remedy IT security risks.

“We don't want the hassle of maintaining enterprise software. It's pretty much hands-off to get the benefits with QualysGuard. We have not had any successful attacks since we installed it.”

Gary Praegitzer, Network Administrator and Security Specialist
Jelly Belly

Benefits of QualysGuard Vulnerability Management:

- Turnkey deployability requires no software to install, update or maintain
- Automates all steps of vulnerability assessment, management and threat reduction
- Trusted, unbiased third-party security auditing and compliance reporting meets industry and regulatory compliance requirements
- Discover all assets across the entire network
- Accurate and always up-to-date vulnerability audits
- Easy-to-use, comprehensive reporting
- Integrated remediation and trouble-ticketing workflow
- Cost efficient with no hidden costs
- Secure, with complete end-to-end data encryption

Qualys Wins Distinguished SC Magazine Awards

- Best Vulnerability Assessment & Remediation Solution
- Best SME Security Solution
- Best European Security Company
- Best European Security Solution

QualysGuard Vulnerability Management Features:

Easily Deployed On Demand Service

- Deploys in minutes with no software installation, setup complications or maintenance upgrades
- Immediately accessible anytime, anywhere via a Web browser

Accurate and Thorough Security Audits

- Network mapping rapidly detects and identifies servers, desktops, routers, wireless access points and other network devices
- Comprehensive vulnerability KnowledgeBase incorporates thousands of unique security checks
- Automatic, daily updates to vulnerability KnowledgeBase
- Non-intrusive detection techniques
- Inference-based scanning engine
- Authenticated scanning capabilities
- Internal and external scanning provides a 360-degree view of network vulnerabilities
- Configurable scans for customized audits
- Unique fingerprints for over 2,000 operating systems, applications and protocols

QualysGuard Scanner Appliances deliver an easy-to-use scanning infrastructure for internal networks that can be deployed in minutes.

Reporting

- Easy access to automatically generated reports via a Web browser
- Executive Dashboard
- Graph and trend reports for managers
- Detailed reports with verified remediation actions for technicians
- Network topology visualization
- CVE and Security Focus-linked vulnerability checks with detailed remediation instructions
- Export reports to HTML, MHT, PDF, CSV and XML formats

Asset Prioritization

- Manage your network by categorizing discovered assets into groups
- Assign a business value to assets based on their criticality to your business operation

Remediation Management

- Automatically generate and verify trouble tickets via dedicated remediation workflow
- Create ticket policies to focus and automate remediation efforts
- Ticket trending and reports by owner, asset group and vulnerability help track performance
- Easy-to-follow instructions to eliminate risks

Interoperability

- Extensible XML API
- Out-of-the-box integration with existing and legacy security management consoles
- Out-of-the-box integration with ticketing systems and helpdesk solutions
- Industry standard support for the addition of custom detections using Open Vulnerability Assessment Language (OVAL)

Support / Maintenance

- 24x7x365 live customer support
- Daily signature updates and feature enhancements are automatic and transparent to the user
- Ongoing Web-based customer training
- Technical training and certification workshops

Pricing

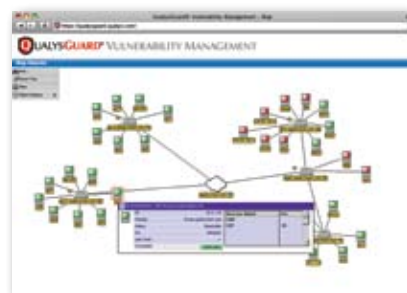

Annual subscription options:

- **Perimeter Scanning:** Pricing is based on the number of IP addresses.
- **Internal & Perimeter Scanning:** Pricing is based on the number of IP addresses (up to 3,072).

QualysGuard Vulnerability Management is also available as part of the QualysGuard Security & Compliance Suite, which includes:

- QualysGuard Vulnerability Management
- QualysGuard Policy Compliance
- QualysGuard PCI Compliance
- QualysGuard Web Application Scanning
