

**jetNEXUS Solutions are experts in application acceleration.**

We recognise that solving application performance issues can be complex. With this in mind, jetNEXUS Solutions have created a portfolio of solutions, combining our own technology and other industry leading products.

We offer our clients the benefit of our unique technical experience to advise them of the best route to take and the right technology fit. All our solutions are backed by our outstanding Tenacious Support™.

**jetNEXUS Solutions helps organisations that need to:**

- Deliver outstanding end user performance.
- Ensure their applications are available 100% of the time.
- Overcome the effects of distance and latency.

Our clients include William Hill, Woolworths, easyJet, Lloyds TSB, SMART, Addison Lee, Bourne Leisure, Royal Borough of Kensington & Chelsea, ARM and Computacenter.

**jetNEXUS is the product development arm of jetNEXUS Solutions.**

Having developed, implemented and supported application acceleration solutions for the past decade, jetNEXUS technology enables clients to increase the performance, scalability and manageability of their mission critical applications.

- Microsoft IIS Acceleration Software
- Advanced Load Balancing
- Next Generation Application Traffic Management
- A Range of Appliances to Suit, from Entry Level to Enterprise Requirements

**jetNEXUS Solutions is a fully accredited Premier Partner of Riverbed.**

Riverbed are global leaders in point to point network acceleration. The range of Riverbed Steelhead Appliances enable applications running over the WAN to behave with LAN-like performance. Improvements in many cases can be 200x faster.

- Accelerate Applications Over the WAN
- Optimise WAN Bandwidth Utilisation
- Enable IT Consolidation
- Accelerate Backup, Recovery and Replication
- Accelerate Mobile Workers & Branch Offices

**jetNEXUS Solutions is a fully accredited Premier Partner of Zeus Technology.**

Zeus Technology develop software to improve network and web-enabled services by making them run faster, more reliably, more securely and easier to manage. Zeus offer a range of software solutions for server load balancing, global load balancing and application traffic management.

- Award Winning Technology
- Advanced TrafficScript™ Language
- Can be Installed on Standard Hardware
- Also Available as a Virtual Appliance

**jetNEXUS provide industry leading consultancy and development services.**

Drawing on our extensive experience of working with leading edge internet and blue chip companies, jetNEXUS enable clients to close the gap between the network and the application, building the most scalable, secure and high performance systems.

- Application Profiling and Tuning
- Network Design and Capacity Planning
- Performance Modelling, Simulation & Testing
- System Trouble Shooting & Problem Solving
- Security Policy Assessment, Design & Implementation
