## THE SHOW THAT SECURES YOUR BUSINESS

[www.infosec.co.uk](http://www.infosec.co.uk)

## Network Privacy and Information Assurance

### GuardDisk

#### Secure hard disk encryption

- Protects sensitive data if laptop is lost or stolen
- Advanced 'two stage' access control mechanism
- Protects sensitive data marked up to UK 'TOP SECRET'
- Compatible to modern operating systems including Windows XP and Linux
- Fully hardware based solution
- No loss of hard disk capacity

### SafeDial™+

#### Encryptor PC Card

- Eliminate security risks for remote users
- Connection via GSM, ISDN, V90 modem and other options
- Tamper resistant design
- Approved for UK Government 'Enhanced Grade' use
- UK Government approved algorithms
- Soft-loadable custom algorithm capability
- Simple installation into laptops, notebooks and PC card remote access servers
- Data rates up to 128 Kb/s with encryption running at line speed

### Datacryptor 2000™

#### Next Generation Encryption

- Soft loadable capability protects initial hardware investment
- AES ready
- Support for a full range of network protocols for Public and Private networks
- Support for diverse encryption standards
- Designed to the highest security standards, FIPS, CAPS and Common Criteria
- Physical integrity ensured
- Developed from 20 years of WAN encryption experience

# Securing Business Transactions

## AssureTransaction®

### Transaction Security Middleware for B2B e-commerce

- Verify digital signatures in your applications
- Sign binding customer contracts online
- Integrate multiple authentication systems
- Compliant with PKI and Identrus standards

## WebSentry™

### High security hardware for e-business applications

- Cryptographic processor for e-business application servers
- Digital signatures and data encryption functions
- PCI and ethernet hardware interfaces
- FIPS 140-2 certified tamper-resistant hardware
- Built-in load-balancing and redundancy
- Soft-loadable firmware
- Standard development interface

## Tokens

### Personal authentication

- SmartCard Reader Pinpad
- WatchWord 3
- WatchWord Smart SmartCard with Reader Sleeve

Their confidential  
information is  
staying confidential.

As your online offerings become more innovative you need to know that all your confidential information is protected against malicious disclosure. And your reputation kept safe. WebSentry™ PCI and Ethernet are certified hardware cryptographic engines that provide the high level of security your data deserves. As an integrated family of tamper-resistant cryptographic devices, WebSentry™ ensures maximum protection for cryptographic processing, payment transactions and digital signatures in application servers, for middle end and back office systems. With its integrated state-of-the-art resource management, you can also trust the WebSentry™ platform to secure your data under any conditions. It's so reliable, even the cryptographic core is protected to the highest standards by independent certification bodies. Just visit [www.thales-esecurity.com/websentry](http://www.thales-esecurity.com/websentry) to find out more about how WebSentry™ can keep your confidential data safe without compromising quality of service.
